📍 Hyderabad

SUMMARY

Devops and Cloud Engineer with 4+ years of experience building scalable, reliable production systems across AWS and Azure environments. Specialize in CI/CD automation, infrastructure as code (Terraform), and container orchestration using Kubernetes and Docker. Experienced in bridging Devops with AI, developing RAG pipelines, agentic workflows, and LLM-powered solutions for production use. Proven track record of improving deployment speed, reducing manual effort, optimizing cloud costs, and enhancing system performance. Currently focused on AIOps, AI observability, and building intelligent, self-healing infrastructure systems.

EXPERIENCE

Devops & SRE Engineer

EY

📅 06/2025 - Present 📍 Hyderabad

Application Engineering Services

- ✓ Served as a DevOps & SRE Consultant for Bank of America, supporting 70+ applications across diverse tech stacks and operating systems within the Research and Sales domain
- ✓ Worked as a DevOps & SRE Consultant for Bank of America, supporting 70+ applications across different tech stacks, making sure systems stayed stable, available, and running smoothly.
- ✓ Improved CI/CD pipelines using Jenkins, Ansible Tower, and XLR, which sped up deployments and releases by around 80% and made delivery much more reliable.
- ✓ Automated database deployments, schema changes, and Autosys JIL processes, cutting down manual work and reducing errors in day-to-day operations.
- ✓ Helped move monitoring from ITRS to Dynatrace and Splunk, bringing in a more AIOps-driven approach that improved issue detection and reduced incident response time.
- ✓ Built RAG-based solutions using internal data to make debugging build and deployment issues faster and easier for development teams.
- ✓ Managed patching and upgrades for 100+ servers using BMC BladeLogic, and automated pre/post health checks with Ansible and Python to reduce effort and improve consistency.
- ✓ Worked on fixing OS and application vulnerabilities across different systems, helping strengthen overall security and compliance.
- ✓ Set up disaster recovery processes, including contingency environments and ARC, to make sure systems could recover quickly when needed.
- ✓ Handled server and load balancer certificates using Venafi, ensuring secure communication across systems.
- ✓ Improved secrets management by onboarding service accounts into a vaulting solution built on HashiCorp Vault.
- ✓ Supported teams in exposing and integrating tools using MCP (FastMCP), helping move toward more flexible and scalable system integrations.

Devops Engineer

HCLTech

📅 08/2022 - 06/2025 📍 Hyderabad

DevOps Integration & Automation

- ✓ Led migration of 6 interconnected applications across environments, ensuring zero downtime and seamless system integration, improving data processing efficiency by 15% in production workflows.
- ✓ Built and automated CI/CD pipelines using **Bitbucket, Jenkins, Ansible Tower, XLR** reducing deployment time by 30% and improving build reliability and consistency.
- ✓ Implemented **Infrastructure as Code** using **Terraform**, achieving a 40% reduction in infrastructure provisioning time and improving scalability across environments.
- ✓ Designed and managed containerized environments using **Docker, Kubernetes, ECS, and EKS**, enabling efficient orchestration and scalable deployments for modern applications.
- ✓ Automated configuration management and system operations using **Ansible, AWS CLI, Lambda, and Linux scripting**, reducing manual effort and improving operational efficiency.
- ✓ Established **Git-based version control and branching strategies** (Git), enhancing collaboration, reducing merge conflicts by 25%, and accelerating release cycles in Agile environments.
- ✓ Worked extensively with **AWS services (IAM, EC2, S3, VPC)** to build secure, scalable cloud infrastructure while optimizing resource utilization and deployment workflows.

EDUCATION

Bachelor of Technology in Electronics and Communication

[Jawaharlal Nehru Technological University](#)

📅 06/2018 - 06/2022 📍 Kakinada 8.3 CGPA

ACHIEVEMENTS

- Awarded the ERS Champion Award at HCLTech for exceptional performance and contributions over a 2-year tenure, recognized for driving key initiatives and delivering high-impact results.
- Honored with the Employee of the month Award for outstanding teamwork and active collaboration, consistently enhancing team dynamics and productivity.
- Received Client Extraordinaire Award from EY Partner for the Client Appreciation

SKILLS

Versioning Tools: Git, GitHub

CI/CD Tools: Jenkins, AWS CodeBuild, AWS CodePipeline

Configuration Management Tools: Ansible

Infrastructure Management Tools: AWS CFT, Terraform

Cloud: AWS (EC2, VPC, EBS, S3, IAM, RDS,Cloud Watch, AWS Lambda, ECS, EKS).

Cloud: Azure (Azure Repo, Azure Pipelines, Azure Release Pipelines)

Database: RDS, MySQL

Scripting Languages: Shell Scripting, SQL, Python

Operating System: Linux, Windows

Containerization & Orchestration Tools: Docker, Kubernetes

AI Tools: AIOps, Dynatrace, Splunk, MCP, Python, Agentic AI, RAG

CERTIFICATIONS

- Python Programming certificate by GUVI
- GitHub Foundations Certificate by GitHub
- GCP badges for Associate Cloud Engineer
- AWS Cloud Practitioner Certificate by AWS
- Agile Methodologies in software development certificate by Skill Soft
- Prompt Engineering Techniques certificate by Skill Soft
- AngularJS Certificate by Hacker Rank

PROJECTS

Bank of America

📅 06/2025 - Present 📍 Hyderabad

- Served as Served as a DevOps & SRE Consultant for Bank of America, supporting 70+ applications across diverse tech stacks, ensuring high availability, stability, and consistent production performance. Optimized CI/CD pipelines using Jenkins, Ansible Tower, and XLR, accelerating deployments and release cycles by 80% while improving reliability and delivery efficiency. Automated database deployments, schema changes, and Autosys JIL processes, reducing manual effort, minimizing errors, and improving operational workflows. Transformed monitoring by migrating from ITRS to Dynatrace and Splunk, enabling an AIOps-driven approach that improved incident detection and reduced response times. Streamlined patch management for 100+ servers using BMC BladeLogic and automated health checks with Ansible and Python, reducing operational overhead and improving consistency. Built RAG-based debugging solutions and improved security by remediating vulnerabilities, implementing Disaster Recovery (ARC), and strengthening secrets and certificate management using HashiCorp Vault and Venafi.

Tools and Skills: Dynatrace, Splunk,AIOps,Bitbucket,Git,Bash, Jenkins,Ansible Tower,XLR,Autosys,Python,RAG,MCP,Agentic AI,Venafi,Vulnerability Management

UD TRUCKS

📅 09/2022 - 06/2025 📍 Japan

- Served as a consultant for UD TRUCKS, a Japanese company, developed applications for factory personnel in the manufacturing assembly line of trucks and cabs, resulting in a 25% increase in operational efficiency and a 15% reduction in production errors.
- Automated the entire application lifecycle starting from code management to production deployment using AWS (Build, Deploy services) and implemented strategic branching, cutting deployment time by 30% and decreasing code conflicts.
- Enhanced team collaboration, task tracking, and project visibility by implementing Agile practices with Azure Boards, improving project delivery timelines by 20%.

Tools and Skills: Visual Studio, MS SQL Server, ASP.NET, ASP.NET MVC, Git, AWS CodeBuild, AWS CodeDeploy, AWS EC2,AWS EKS,AWS Lambda, SQL.
